Tent Magic Ultra

INSTRUCTIONS

Tent Magic Ultra is a water-based treatment that when applied, will repel dirt, grease, water & oil on most textile products. Ultra is NOT recommended for use on vinyl, plastics, rubber or imitation suede. Ultra is suitable for canvas, boat covers, tarps, awnings, annexes, synthetic tents and sportswear and covers and footwear. Ultra will extend the life of the fabric by approximately 15%. Any previous proofing treatments need to be thoroughly removed.

When Ultra is applied to fabric surfaces the active ingredients form an impenetrable shield.

Preparing the article for treatment– Use only on cleaned dry fabric.

Remove any dust or dirt by lightly brushing.

Severe soiling should be removed with clean, warm water – do not use any soap, detergent or other cleaning agents.

For mildewed fabric, a pretreatment of Tent Magic Death Moss Mould and Mildew Cleaner, diluted 1 part to 6 or as necessary to remove growth and spores (be sure to carefully read and follow any safety directions outlined by Tent Magic).

Allow item to dry completely before applying Tent Magic Ultra.

A test for colour fastness in a hidden area is recommended before application.

This product has been formulated to impart water, soil & oil repellency however the manufacturers and distributors cannot accept responsibility for results obtained as both the pretreatment conditions and the method of application are beyond their control.

PREPARATION

Work outdoors, or in a well-ventilated area.

Select a warm, sunny day to apply treatment (preferably) or if not a dry area with no moisture penetration.

Fabric may change colour slightly. Test the effects in an inconspicuous area and allow to dry before assessing results.

APPLICATION

Spray with an overlapping motion until fabric is evenly wet, but not so as Ultra is running or beading off..

Allow to dry completely before exposing to moisture, or folding and storing the article.

During drying, the treated item must be kept clean and free from moisture, dew etc.

DRYING TIME AND CURING TIME

Tent Magic Ultra must be able to dry and cure properly and this is vital for optimum water and oil repellent properties to work fully. A minimum of 24 hours is needed, 48 hours is the optimum

PO Box 230293, Botany, Auckland 2163 Ph 021358789 or 09 9744214

curing time. This is entirely dependent of FABRIC WEIGHT, AGE, CONDITON OF FABRIC and FABRIC DENSITY. Keep persons and pets out of area until treated fabric has dried.

COVERAGE

Depending on fabric weight and absorbency, a 500-ml bottle will cover approximately 4.5 to 6.5 square metres of untreated fabric. 1 litre will cover 9 to 13 m2, 2 litres 18 to 26m2, 4 litres covers 36-52 m2 and 5 litres 45 to 65m2 of untreated fabric.

SAFETY DIRECTIONS

Keep out of children's reach.

Harmful if swallowed, inhaled or absorbed.

Avoid contact with skin and eyes.

Work in a well-ventilated area.

Do not treat tents, annexes etc from the inside, and allow to dry completely before occupying.

Do not spray in to eyes, mouth or on to skin.

FIRST AID

If swallowed, DO NOT induce vomiting, but give plenty of water or milk and contact your doctor or National Poisons Centre (0800 POISON 764-766) immediately.

If contact with skin, wash affected areas with soap and plenty of water.

If in eyes, flush with copious amounts of water for 15 minutes and seek medical attention if irritation persists.

STORAGE CONDITIONS

Do not store Tent Magic Ultra below 5° C or above 40°C.

Always at your service
